

MANUFACTURER'S DECLARATION OF CONFORMITY

Undersigned, representing REFFLEX-International BV, Augsburgstraat 29, NL-3047 AA Rotterdam (The Netherlands), declares that:

The REFFLEX® systems of synthetic flexible hose with metal fittings for connecting refrigeration pressure equipment do comply with national and CE norms and safety regulations according to DIN EN-1736 class 2.

Above mentioned products may be applied in refrigeration-, air conditioning- and other refrigeration-based equipment, working with all class-1 and class-2 non-corrosive and natural refrigerants (NB: NH₃ excluded), along with the related commonly applied lubrication oil.

The above mentioned equipment may only be put into service after has been determined that the subject does fully comply with the essential requirements and other relevant provisions of all applicable CE Directives.

The internal maximum volume of any REFFLEX® flexible hose I.D.= 2.0 mm (theoretical maximum length of hose 50 M) is 0.157 L.

The internal maximum volume of any REFFLEX® flexible hose I.D.= 5.0 mm (theoretical maximum length of hose 25 M) is 0.491 L.

According above data, REFFLEX® hoses do not require a "Declaration of conformity" to Directive 2014/68/EU.

Respectfully submitted January 2019,

REFFLEX-International BV
REFFLEX INTERNATIONAL B.V.
